ABSTRACT

YESI PERMATA SARI (2011). A STUDY ON WORD COINAGE ON MOTOGP WORLD CHAMPIONSHIP

Madiun: English Department, The Faculty of Letters, Catholic University of Widya Mandala.

This study discusses word coinage. It is concerned with the kinds of word coinage on MotoGP World Championship and the process of the formation words of the term in MotoGP World Championship.

This research is descriptive in nature, which involves the following steps: collecting, classifying, and analyzing data. The source of the data is the article of MotoGP that is taken from <http://www.motogp.com/en/About+MotoGP>

The population of this research is all the words undergoing word coinage processes. The technique applied to take the sample was purposive sampling.

The referential equivalence method was applied to describe the derived words undergoing word coinage. While to describe the process of the formation of the term, pragmatic equivalence method was used.

Furthermore, there are 5 kinds of word coinage found on the MotoGP World Championship to create new words namely, *acronymy*, *clipping*, *derivation*, *compounding*, and *antonomasia*. The data analysis showed that word coinage formed through *acronymy* are 4 (10,4%) in number, word coinage through *compounding* are 29 (58,4%) in number. It is derived from 21 (41,7%) data of endocentric compound and 8 (16,7%) data of exocentric compound, word coinage through *clipping* are 5 (10,4%) in number, word coinage through *derivation* are 6 (12,5%) in number, and word coinage through *antonomasia* are 4 (8,3%) in number.

The process of the formation of the word coinage happens in MotoGP World Championship. Most of acronym in MotoGP is formed from the initial of the word. The next word coinage is compound. The endocentric compound itself formed from the compound noun+noun, compound adjective+noun, compound noun+adjective, and compound verb+noun. While the exocentric compound is formed from compound noun+noun, and compound adjective+noun. Another word coinage is clipping. There are four types of clipping, such as, back clipping, middle clipping, fore clipping, and complex clipping. In this analysis the researcher only finds back clipping. The other word coinage is derivation. Derivation is formed from the base attaches by a prefix or suffix or both of them. Derivational suffix attaches the word; it sometime can change the syntactic category but not always. The others word coinage is antonomasia. It can be formed from the name of person or company and it becomes the brand of the product.

ABSTRAK

YESI PERMATA SARI (2011). A STUDY ON WORD COINAGE ON MOTOGP WORLD CHAMPIONSHIP

Madiun : Jurusan Sastra Inggris, Fakultas Sastra, Universitas Khatolik Widya Mandala.

Penelitian ini membahas *word coinage*. Pembahasan tersebut meliputi jenis – jenis *word coinage* dalam kejuaraan dunia motoGP dan proses *pembentukan kata baru* dalam kejuaruaran dunia MotoGP.

Riset ini menggunakan metode deskriptif yang meliputi tahapan sebagai berikut: mengumpulkan, mengklasifikasikan, dan menganalisis data. Data penelitian ini diambil dari artikel kejuaraan dunia MotoGP pada situs <http://www.motogp.com/en/About+MotoGP>

Populasi penelitian ini merupakan seluruh *pembentukan kata* dalam kalimat yang terdapat pada artikel MotoGP. Untuk memperoleh sampel, penelitian ini menerapkan *purposive sampling*.

Metode analisis yang digunakan untuk menggambarkan proses pembentukan kata adalah teknik penjabaran. Sementara itu, untuk menjelaskan arti dari pembentukan kata menggunakan metode pragmatik.

Lebih lanjut ada 5 jenis proses pembentukan kata yaitu *acronymy*, *clipping*, *derivation*, *compounding*, and *antonomasia*. kata - kata yang terbentuk melalui *acronymy* 4 (10,4%) data, pembentukan kata melalui *compounding* 29 (58,4%) data terdiri dari *endocentric compound* 21 (41,7%) data dan *exocentric compound* 8 (16,7%) data, pembentukan kata melalui *clipping* 5 (10,4%) data, pembentukan kata melalui *derivation* 6 (12,5%) data dan pembentukan kata melalui *antonomasia* 4 (8, 3%) data.

Proses pembentukan kata baru yang terdapat di Kejuaraan dunia MotoGP. Hampir semua acronym yang ditemukan di MotoGP terbentuk dari huruf pertama dari kata. Hanya satu kata yang terbentuk dari kombinasi blend dan acronym. Selanjutnya *endocentric compound* terbentuk dari *compound noun+noun*, *compound adjective+noun*, *compound noun+adjective*, *compound verb+noun*. Sedangkan *exocentric compound* terbentuk dari *compound noun+noun* dan *compound adjective+noun*. Pembentukan kata baru yang lain melalui *clipping*. Ada empat macam *clipping* yaitu *back clipping*, *middle clipping*, *fore clipping* dan *complex clipping*. Dalam penelitian ini penulis hanya menemukan *back clipping*. Pembentukan kata baru selanjutnya dengan *derivation*. *Derivation* terbentuk dari kata dasar yang mendapat awalan atau akhiran atau keduanya. Akhiran yang melekat pada kata kadang merubah kelas kata tersebut tapi tidak selalu. Pembentukan kata baru yang terakhir adalah *word from names*. Kata ini terbentuk dengan mengambil nama orang atau perusahaan dan kemudian berubah menjadi nama merek dari sebuah produk.
