CHAPTER V

CONCLUSION

The objectives of the study are to describe the kinds and the purposes of person deixis used by broadcasters of the radio stations. The person deixis will be discussed pragmatically. It is done by reading some studies that are related to the person deixis, finding the person deixis used by broadcasters of the radio stations, collecting, classifying, and analyzing the data. The data are analyzed descriptively.

In connection with the discussion on the problem of the use of person deixis by broadcasters of the radio stations, some conclusion can be drawn. There are three kinds of person deixis used by broadcasters of the radio stations. The result shows that there are person deixis associated with sex, person deixis associated with age, and person deixis based on social status.

The writer uses speech act theory to know the purposes of the use of person deixis. They are representative, directive, commissive, expressive, and declarative speech acts. Based on the data, the writer only analyzes representative and declarative speech acts. There are 22 data which are included into representative speech acts and 15 data which is declarative speech acts. It means that the purposes of representative and declarative speech acts are the most dominant used by broadcasters of the radio stations.

At last, the writer hopes this can be useful for the readers and the other writers. In the way that person deixis is one of language phenomena in society, and also one of problems in linguistics study.
