

CHAPTER V

CONCLUSION

Communication is needed by human beings to make relationship with one another in their daily life. Nowadays, communication is badly needed by modern community. In this case, communication uses language as its means. It can be said that language is an important means. By the progress of technology communication can be done without meeting face to face. In this activity, human need some instruments, such as telephone, facsimile, and internet.

Internet is one of the sources of information. Internet is a mechanism for connecting or bridging different networks so that two communities can mutually interconnect. Internet becomes a trend for people all over the world. The phenomenon of internet development affects the way of our life. As a matter of fact, there are a lot of netters who subscribe sites in internet. Even many people have their houses installed with internet. In internet there are a lot of sites which provide information. One site which provides the issues about politic, economy, and culture is www.google.com. It also provides a space where the netters can give their comments about something. It is called the discussion forum. Here, every netters have their own language style. Considering the difference, this research is designed to elaborate the language style in terms of syntax, diction, and figure of speech.

From the data analysis, some conclusions can be drawn. All the collected data are seventy units. In terms of syntax, the sentences used on internet (www.google.com) are statement and interrogative sentences. The statement sentences are in higher level of use with fifty-six data than interrogative sentences with fourteen data. Further, in terms of diction the analysis shows that the data in denotation is higher with fifty data than those in connotation with twenty data. Finally, in terms of figure of speech, irony reaches the highest level of use with fifty-eight data. The lower one is personification with thirteen data, while the lowest is hyperbole with nine data.
